

3D Printing Resources

*Anyone can learn to use 3D modeling & printing technology
for creative expression & problem solving*

*Find a model
to print*

www.thingiverse.com

The world's largest 3D printing website, with over half a million uploaded models & an active community of designers.

www.myminifactory.com

A curated platform, MyMiniFactory provides oversight to guarantee that all models on the site are printable.

www.pinshape.com

Designers can set their own prices for their 3D models. Many models are free, but you might try to make a little money from your designs.

www.tinkercad.com

The best way to get started with 3D modeling, Tinkercad offers an intuitive, visual interface and numerous helpful tutorials.

alpha.womp.com

Build models with boxes, cylinders, and curves, and try "gooping" them together to make more organic shapes

stephaneginier.com/sculptgl

SculptGL starts with a virtual ball of clay, and allows you to pull, push, crease, inflate the clay to manipulate the model.

*Make
your own
3D model*

*Other cool
stuff*

www.3dprintingindustry.com

A site dedicated to 3D printing and additive manufacturing, including news on research, business, and includes reviews. Has an excellent beginners guide covering basics and terminology!

www.all3dp.com

Dedicated to digital making of all kinds, includes news on 3D designing, printing, scanning and more.

Submit print jobs, read our use policy, & explore more online resources:
